Re: Update Coronavirus

Dear Valued Customer,

As the Coronavirus -2019-nCoV- continues to spread, I wanted to reach out and inform you that production in the **Nexperia facilities in Guangdong province and Europe, continue to run without interruption.**

However, following strict and binding government regulations, our facilities in Seremban (Malaysia) and Cabuyao (Philippines) need to temporarily suspend operation for manufacturing and shipping. We have started to ship out available inventory from both locations for customer demand of the coming 2 weeks before the suspension becomes active, which means that our customers will receive the goods well ahead of time.

The restart of the facility in Seremban is currently planned for April 1, depending on government updates. The restart of the facility in Cabuyao is currently planned for April 13. In the meantime, the Cabuyao team is looking at ways to keep a minimal operation in place with government approval.

Nexperia continues with utmost priority to fully support its staff and operations. We are strictly following the global WHO COVID-19 advice for the public, as well as the recommendation of local government and health authorities.

As an additional measure, to protect our manufacturing operations we are implementing flexible working schedules and, we are allowing our office-based staff to work from home where working routines allow without impacting business operations.

Nexperia does not have suppliers located in HuBei province and our key suppliers in mainland China, South Korea and Japan continue to fully support Nexperia for both manufacturing material deliveries and end-customer production.

Since we have been able to continue production during this critical period, we are delighted to still offer you a broad range of products directly from available inventory from our China Factory in Guangdong province.

Along with the nCoV development, detailed production and delivery alignment is being executed on a daily basis between the relevant Nexperia Teams. The required adaptations of the orderbook for our Seremban and Cabuyao portfolio will be executed during this week and Customer Service team will share supply impacts with you.

This is an extraordinary situation mandated by government regulations. Nexperia will do its utmost for a continuous supply of goods, but we will not accept any liability for any shortages in delivery or other consequences caused by this force majeure situation.

On behalf of Nexperia,

Gerton Jansen,
Nexperia SVP Marketing & Sales

Ingo Zurlo,
Nexperia Head of Global Supply Chain
